ITSI BIOSCIENCES

ITSI BIOSCIENCES

Providing state-of-the-art bioanalytical solutions to the global scientific community

Reduce:

- Cost by 25% or more
- Time by up to 45%
- And frustration by 100%

Who Are We?

ITSI-Biosciences develops sample preparation kits and bioanalytical reagents for proteomics and protein research, while also serving as an extension of research laboratories. Validated for Proteomics, our products also have a money-back guarantee for your peace of mind.

Our products

- **ToPI.DIGE and ToPI.PAGE** - Isolation of proteins prior to two-dimensional difference gel electrophoresis (2D-DIGE) and poly acrylamide gel electrophoresis (2D-PAGE).
- **ToPI.F2** - Isolation of proteins from formalin-fixed paraffin embedded samples.
- **ToPA and ToPA.Nano** - Quantitation of total proteins using a spectrophotometer, plate reader and the NanoDrop.
- **ASK** - Removal of albumin from plasma and serum prior to analysis.
- **ProFEK** - selection of cytosol, membrane and nuclear proteins.
- **ToPREP** - Precipitation of proteins from solution.

Our core services include:

- Global protein expression profiling.
- Biomarker discovery and validation using 2D-DIGE and mass spectrometry
- Protein identification and characterization
- Glycolysation, methylation and phosphorylation mapping

We are dedicated to the development of easy-to-use, inexpensive bioanalytical kits and the provision of bioanalytical support services to researchers and scientists. We are proud of our continued affiliation as a leading analytical service provider and supplier of reagents to the National Institutes of Health.

Who Do We Support?

ITSI Bioscience's products and services are for research scientists in academia, biotechnology industry and pharmaceutical companies who wish to generate quality results at an inexpensive price. Our products and services will save you save time and money.

Reduce Analysis Completion by about 30%! Both easy-to-use and displaying superior performance, ITSI - Biosciences' products will reduce the time it takes to complete the relevant analysis by an average of 30%. With over 35 years of combined experience in the industry, we are able to generate accurate results - faster!

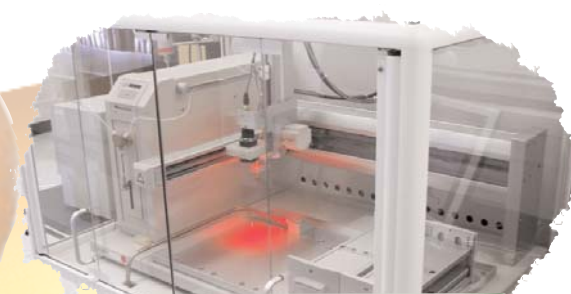

ITSIPrep™

With ITSI-Biosciences' ITSIPrep™, prepare a sample in 45% less time when compared with similar sample preparation products. These kits offer standardized, validated, more reproducible and cost effective analysis. As the most important step in your analysis, ITSIPrep™ accurately and simply produces expeditious results.

Featured Product

Total Protein Isolation Kit for 2D-DIGE (ToPI-DIGE) and 2D-PAGE (ToPI-PAGE)

Prior to further analysis, total proteins require isolation from tissues or cells first. To ensure this is done accurately, utilize ITSI-Biosciences' Total Protein Isolation Kit, containing a set of optimized reagents and standard operating procedures. Each kit is customized and optimized for isolation of total proteins from cell lines and tissue, allowing for quick, convenient isolation of proteins from 10, 20, and 30 samples. Place your order for a Total Protein Isolation Kit today and see the difference it makes to your results!
